SUMMARY

Senior WordPress Developer and Full-Stack PHP engineer with 20 years of experience building and maintaining enterprise websites for international brands such as Merz Aesthetics, Medtronic, and Torrent Pharma. Specialized in multi-site, multi-country WordPress platforms (Bedrock, Composer, custom Gutenberg blocks), headless WordPress (REST API + React/TypeScript), Laravel applications, and marketing integrations (RD Station, Mailchimp, Salesforce, Google Tag Manager). Proven track record in web performance optimization, Core Web Vitals, technical SEO, MySQL query optimization, security incident response, and legacy migrations with zero data loss. Writes tested, maintainable code (PHPUnit, Jest, Vitest, PHPStan), practices Agile (Scrum, Kanban) since 2015, and uses AI-assisted development (Claude Code) to accelerate delivery. Fluent in English.

PROFESSIONAL EXPERIENCE

Senior WordPress Developer (Full-Stack)

Agência F2F (digital agency) · Porto Alegre, Brazil · Apr 2023 – Aug 2026

Technical lead across multiple simultaneous client projects and sole technical reference for the Merz Pharma network (Ultherapy, Confidence to Be Me, Merz Aesthetics) across Argentina, Brazil, Colombia, Mexico, and a regional LATAM site covering other Latin American markets. Stack: WordPress/Bedrock, Laravel, Docker; integrations with RD Station, Mailchimp, Salesforce, Salesforce Marketing Cloud (SFMC), and Crisalix.

- Led the migration of GLP's ~900-page, investor-facing corporate site from a nearly 8-year-old legacy framework to WordPress: identified the root cause of ~390 broken links, **cut mobile render-blocking time by 70–75%**, and removed ~900 orphan pages, documented as a reusable audit playbook.
- Drove front-end performance and **Core Web Vitals (LCP, INP, CLS)** improvements across the Merz Aesthetics, GLP, Tinta de Qualidade, Abrafati, and Alares sites: image optimization (WebP/AVIF, lazy loading), CDN (Cloudflare), critical CSS, render-blocking elimination, JS/CSS minification and deferral, and replacing heavy plugins and page builders.
- Optimized back-end performance on the same sites through **MySQL query and database optimization**, plus page and object caching (Redis).
- Remediated a suspected malware incident across a 5-site Ultherapy network, then turned the fix into a standardized, AI-assisted (Claude Code) routine for updating WordPress core and Composer dependencies across 10 repositories (2 brands across 5 Latin American markets), **cutting the update cycle from 1 week to 1 day**.
- Built 5 continuous integrations between Medtronic's multi-country landing pages and RD Station, **reaching 100% error-free lead capture** by normalizing divergent form fields across countries (e.g., "estado" vs. "provincia") into a single CRM record.
- Restored the reliability of campaign data across a 5-site Merz Aesthetics network by fixing broken conversion events in Google Tag Manager (GTM) and DataLayer, the data the marketing team relied on for **media spend decisions**.
- Delivered Alares' first e-commerce store, integrated with RD Station so that **every purchase attempt became a lead**, including sales blocked by lack of coverage in the customer's region.
- Rebuilt the clinic-finder search on Confidence to Be Me with Google Places API + ViaCEP, replacing a fragile in-house integration that was **preventing patients from finding accredited clinics**.

Also: rebuilt the Tinta de Qualidade and Abrafati sites on custom Gutenberg blocks (React + PHP), replacing the Cornerstone page builder; built the ChegoLá Consórcios site on native Gutenberg blocks with no page builder and maintained its Salesforce integration; supported the Norton Brazil team with content and page building on their Drupal site; delivered Laravel features for Torrent Pharma (multi-PDF uploads per product) and for Confidence to Be Me's find-a-doctor expansion into DPLATAM (Laravel + Docker).

WordPress Developer

DEXA · Remote · Jan 2022 – Mar 2023

- Built, as sole developer, the data-management module for MinervaFoods' Carcass Efficiency Program (PEC): a custom WordPress plugin integrated with an external API that **replaced manual Excel-based tracking** with automated result logging and filtering.
- Team member on the rebuild of MinervaFoods' corporate portal, replacing the Divi page builder with a custom theme built on 20+ custom blocks (ACF Pro); contributed to Coty's international site and led development of the international Perch project with direct client contact.
- Implemented automated deployments with Jenkins and GitHub Actions, documented components in Storybook, and standardized development environments with Docker, Lando, and Local.

Independent Developer & Founder

Self-employed · Rio Grande do Sul, Brazil · Sep 2017 – Jan 2022

Designed, built, and ran my own web products end to end: architecture, infrastructure, and delivery.

- **tchebusca.com.br:** regional business directory in WordPress (~40 businesses, 10 cities, ~5k monthly visits). Managed the full stack on a DigitalOcean VPS (Apache, MySQL, PHP), with Google Maps geolocation, search by city/industry/name, and WP-Admin training for collaborators.
- **mudatexto.com.br:** JavaScript text-conversion tool built to validate a product idea, with Google Ads monetization.

Earlier Experience

- **PHP Developer,** *Plural WeB Digital · Porto Alegre, Brazil · Nov 2016 – Aug 2017*. Built and maintained WordPress sites and portals, plus legacy AngularJS and CodeIgniter systems; handled production deployments via SSH/SCP with Git version control.
- **PHP Developer,** *Join Tecnologia & Design · Sep 2015 – May 2016*. Built systems for the Brazilian federal government in object-oriented PHP (Symfony, Silex, Doctrine, Twig) on MySQL, PostgreSQL, and SQL Server, including a management system for IPHAN and a nationwide occupational health reporting system for SESI integrated with a legacy Java/SQL Server system. First Scrum team (sprints, daily stand-ups).
- **WordPress Developer,** *Rage Comunicação Interativa · Porto Alegre, Brazil · Oct 2011 – Aug 2015*. Sole developer of the complete migration of Trajano Silva's high-volume financial auction system from ASP + SQL Server (stored procedures) to CodeIgniter + MySQL with a WordPress content portal, **with zero data loss and no business downtime**. Also built WooCommerce stores, a WordPress Multisite environment, and portals for real estate brands (Rossi, Melnick Even, Cyrela Goldsztein).
- **Full-Stack PHP Developer,** *Freelance · Nov 2005 – Sep 2011*. Built websites and portals with WordPress, CodeIgniter, and MySQL, including database modeling and Linux/Apache server setup.

OPEN-SOURCE PROJECTS

github.com/pedrorvidal · 2026

- **BP Tracker (Headless WordPress + React):** custom REST API built as a WordPress plugin (PHP 8.2) with JWT authentication, refresh-token rotation with reuse detection, rate limiting, CORS, and role-based access control, consumed by a React 19 + TypeScript SPA (Vite, TanStack Query, Tailwind CSS, Recharts). Quality gates: PHPUnit and Vitest suites, PHPStan (level 6), WordPress Coding Standards, ESLint/Prettier, GitHub Actions CI, Dependabot.
- **PV Blocks Suite:** 20 dynamic Gutenberg blocks, server-side rendered in strictly typed PHP 8.2, with React + TypeScript editors and the WordPress Interactivity API; accessibility-first markup, i18n (pt_BR), 200+ PHPUnit tests plus Jest unit tests.
- **Also:** Vidal Slider Block (dynamic Gutenberg slider, PHPUnit-tested) and PV Simple WhatsApp Button (typed PHP/TypeScript, PHPStan, PHPUnit with Brain Monkey).

SKILLS

WordPress: WordPress, WordPress Multisite, Gutenberg (custom blocks, Interactivity API), WooCommerce, Advanced Custom Fields (ACF Pro), Bedrock, Composer, WP-CLI, Headless WordPress, WordPress REST API

Back-end: PHP 8 (OOP, strict types), Laravel, CodeIgniter, Symfony, REST APIs, JSON Web Token (JWT)

Front-end: JavaScript, TypeScript, React, HTML5, CSS, Sass, Tailwind CSS, Vite, TanStack Query

Databases & Performance: MySQL (query optimization, database performance tuning), PostgreSQL, Redis, Core Web Vitals, Web Performance Optimization, Technical SEO, Cloudflare

Testing & Code Quality: PHPUnit, Jest, Vitest, React Testing Library, PHPStan, PHP_CodeSniffer (WordPress Coding Standards), ESLint, Prettier, Playwright

DevOps & CI/CD: Docker, wp-env, Git, GitHub, GitLab, Bitbucket, GitHub Actions, Bitbucket Pipelines, Jenkins, Linux, Apache

Integrations: RD Station, Mailchimp, Salesforce, Salesforce Marketing Cloud (SFMC), Google Tag Manager (GTM), Google Places API, Google Maps API

AI & Automation: Claude Code, MCP, AI-assisted development workflows

Methodologies: Agile (Scrum, Kanban)

EDUCATION & LANGUAGES

Bachelor's Degree in Informatics · Universidade Regional Integrada do Alto Uruguai e das Missões (URI) · 2000 – 2005

Languages: Portuguese (native) · English (fluent, full professional proficiency)
